

## #ImportantStuff

This part of the application helps us make sure that our data will be handled in accordance with Twitter's Developer Policies.

Our ultimate goal is to keep Twitter a safe and healthy space for public conversation.

### What's not allowed

Some activities (like surveillance) are never allowed on Twitter. Take a look at our restricted uses page. Double-check that your intended use is policy compliant.

### Automation guidelines

If you plan on enabling any sort of automated activity on the platform (like a bot), be sure to review our automation rules.

### Provide thorough answers

We need to fully understand your intended use and if whether it meets our policy guidelines. That's the only way to have your application approved.

So, please include as much detail as possible in your answers.

All fields are required unless marked optional

## How will you use the Twitter API or Twitter Data?

### In your words

In English, please describe how you plan to use Twitter data and/or APIs. The more detailed the response, the easier it is to review and approve. [Learn what specific information to include in your use case](#)

I'm a computer science student at UDESC, so i want to build a bot probably to search and publish stuff about politics, economics, statistics and computer science, and also to find and publish about nice data that i will try to get with the twitter API.

## The specifics

Please answer each of the following with as much detail and accuracy as possible. Failure to do so could result in delays to your access to Twitter developer platform or rejected applications. Need help? [Get support now](#).

Are you planning to analyze Twitter data?

Yes

**Please describe how you will analyze Twitter data including any analysis of Tweets or Twitter users.**

I pretend to search for words, maybe regular expressions to plot data about what the public has been talking about, things like that.

Will your App use Tweet, Retweet, Like, Follow, or Direct Message functionality?

Yes

**Please describe your planned use of these features.**

Yes, i pretend to some automattically news posting, and this news will probably be from other tweets, so it will use retweets a lot i think.

Do you plan to display Tweets or aggregate data about Twitter content outside Twitter?

✓ Yes

**Please describe how and where Tweets and/or data about Twitter content will be displayed outside of Twitter.**

Probably if i start using my bot to search for data, the files that i will be generating will be available on my github (it means they will be public), and maybe i will tweet about some data that i will eventually try to get.

Will your product, service, or analysis make Twitter content or derived information available to a government entity?
